DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicants are required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14 and 17-19, drawn to a module useful for purifying a fluid.

Group II, claim(s) 15, drawn to a method of fabricating a fluid purification module.

Group III, claim(s) 16 and 20, drawn to a method of cleaning a fluid purification system.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature shared by the groups is a housing containing from the outset a cleaning agent disposed so as to come into contact with fluid circulating in the housing. This technical feature does not make a contribution over the prior art. See, for example, US 4,780,197 to Schuman, WO 03080128 to Cuno, Inc., US 6,325,926 to Hansen and US 6,485,641 to McLeod.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 the cleaning agent is housed in a recess in a raised portion of the housing; and

Species 2 the cleaning agent is housed in a space delimited by a cage.

4. Applicants are required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The claims are deemed to correspond to the species listed above in the following manner:

Claim 17 corresponds to Species 1; and

Claim 18 corresponds to Species 2.

The following claim(s) are generic: claims 1, 14, 15, 16 and 20.

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the special technical feature of Species 1 is that the agent is housed in a recess in a raised portion of the housing and this feature is not present in Species 2. The special technical feature of Species 2 is that the agent is housed in a space delimited by a cage and this feature is not present in Species 1. Therefore, unity of invention is lacking.

7. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
